

**AMI TECHNOLOGIES LTD.**

*.....it's a Multi Engineering Solution*

*Leading Advance Technology  
in Fire Safety & Security.*

## About Us:

Founded in 2005, Ami Technologies Ltd is a leading provider of firefighting equipment and multi-engineering solutions in Bangladesh. With a strong commitment to safety, innovation, and excellence, we specialize in delivering state-of-the-art products and services to meet the critical needs of industries worldwide.

Our expertise lies in offering a comprehensive range of firefighting tools, equipment, and systems designed to ensure safety and protection in the most demanding environments. In addition to our firefighting solutions, Ami Technologies Ltd excels in providing customized engineering services leveraging advanced technology and a highly skilled team to cater to diverse industrial challenges.

## Our Mission:

At Ami Technologies Ltd, our mission is to safeguard lives, property, and industries by providing world-class firefighting equipment and innovative multi-engineering solutions. We are dedicated to delivering reliable, cutting-edge products and services that empower our clients to overcome challenges with confidence and ensure safety in every environment.

## Our Vision:

Our vision is to be a global leader in firefighting equipment and multi-engineering solutions dedicated to creating a safer and more sustainable world. We aspire to innovate and deliver advanced technologies that empower industries, safeguard communities, and protect lives in even the most challenging environments.

## Message from Managing Director

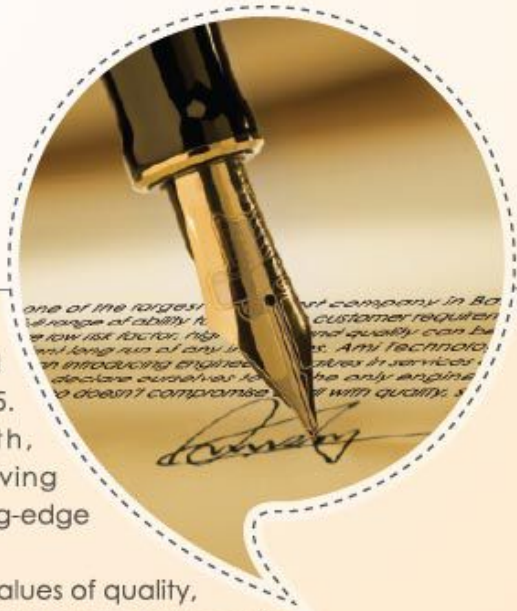

At Ami Technologies Ltd, we have been dedicated to providing top-quality firefighting equipment and multi-engineering solutions since our inception in 2005. Our journey has been one of continuous growth, innovation, and commitment to excellence in serving industries and communities that rely on safety and cutting-edge technology.

As we continue to grow, we remain steadfast in our values of quality, integrity, and customer satisfaction. We believe in forging strong partnerships with our clients and stakeholders, ensuring that our solutions are tailored to their unique needs. Together, we aim to create a safer, more efficient, and resilient future.

Thank you for trusting Ami Technologies Ltd as your partner in safety and engineering solutions. We look forward to continuing to serve you with the dedication and excellence you deserve.

Warm Regards,

**Md. Liakat Ali**  
B.Sc Engr. (Mech), MIEB  
Managing Director  
Ami Technologies Ltd.

## Fire Alarm System (Cooper, UK)

**COOPER** Safety  
Fire Systems

Control Panel

### Features

- UL Certified
- Large versatile touch-screen user interface
- 2 or 4 Class A style 7 SLC loops
- Event history buffer (9,999 events) with date / time stamp
- 4 Notification appliance circuit (NAC's) outputs
- Dedicated alarm, trouble, AC trouble relays
- Integral short circuit isolators
- Up to 200 addresses per loop
- Full network capability up to 126 panels

Multi Detector

Smoke Detector Heat Detector

Manual Callpoint

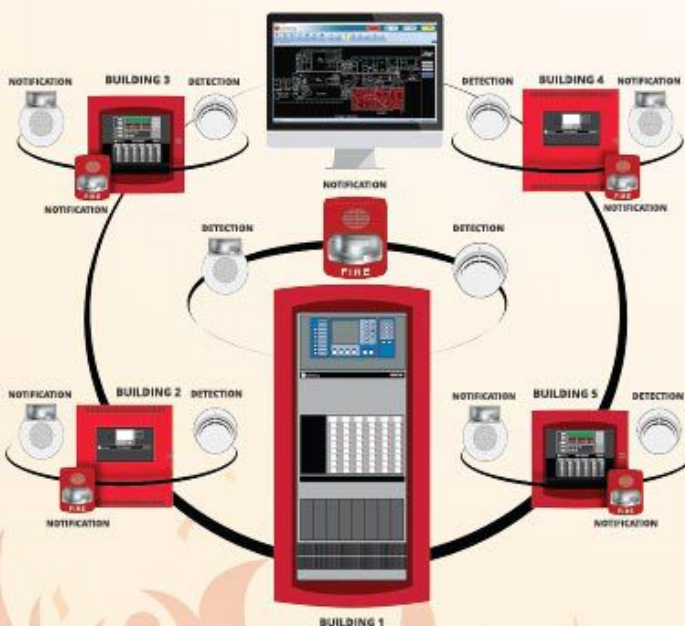

Horn with Strobe

Output Module Input Module

## Fire Alarm System (Simplex, USA)

**Simplex**

### Features

- Scalability allows you to accommodate growth from 250 to 1,000 points
- IP networking offers speed and flexibility at every stage
- The 4010ES delivers all the benefits of addressability with TrueAlarm addressable sensors and TrueAlert ES notification appliance
- A perfect, addressable solution for large buildings campuses and applications requiring voice evacuation
- High-speed, IP-based networking supports advanced data voice, and firefighter telephone communication
- Forward/backward compatibility protects your investment and makes it easy to keep current with the latest Technology
- Up to 250 device per loop

Smoke Detector

Multi Detector

Heat Detector

## Fire Alarm System (Hochiki, USA)

Control Panel

Pull Station

Hand Held Programmer

Duct Detector

### Features

- Digital Communication Protocol (DCP)
- Non-directional smoke chamber
- Vandal-resistant security locking
- CO sensor life span
- Flat response and flat sensitivity
- Balanced sensitivity
- Low sensitivity to steam
- Multi-sensor modes

Smoke, Heat  
CO Detector

Multi-Criteria Sensor

Smoke Sensor

## Fire Alarm System (Triga, USA)

CO Detector

Smoke Detector

### Features

- UL 864 10th Edition & FM Approved
- Point Flexibility of 2100 Points
- Distributed SLC Expander throughout the field
- 318 Addressable devices per loop
- Flexible addition of SLC loop expanders Via SBUS
- User Friendly LCD display
- Expandable to 32 node in network
- Supporting over 67 ,200 points on a single peer to peer network

Relay Base

Wireless Detectors

Pull Stations

## Design & Consultancy

**Ami Technologies Ltd** can design, furnish and install all types of Fire Detection System, Hydrant System & Sprinkler Systems according to BNBC and NFPA. We provide design and install services for Industrial, commercial and residential customers in Bangladesh. Our Ami Technologies Ltd Engineers have many years of expertise and work closely each customer. Our knowledge and understanding of BNBC & NFPA will assure you that your system will exceed expectations. We specialize in delivering comprehensive design and consultancy solutions for fire safety and multi-engineering systems.

Our expert team provides innovative, code-compliant, and cost-effective designs tailored to meet industry standards and client needs. From fire protection systems and life safety planning to mechanical, electrical, and plumbing (MEP) engineering, we ensure seamless integration of safety and efficiency in every project. Our consultancy services include risk assessments, regulatory compliance guidance, and advanced engineering solutions, empowering businesses with reliable and sustainable infrastructure. Partner with us for cutting-edge engineering excellence and future-ready safety solutions.

## Installation

**Ami Technologies Ltd** With years of experience, our Installers will provide you with a professional installation that demonstrates extensive knowledge and skill. Our crews take pride in their work and have enthusiasm about their career. We offer ongoing training and apprenticeship programs to maintain high standard of quality while encouraging individual growth and commitment. customers in Bangladesh.

## Services

**Ami Technologies Ltd** Provide full-service, fully equipped technicians or experts in installation of fire protection systems. Because they know how these systems are built, they know better than anyone how to repair and maintain those systems.

## Monthly / Yearly Maintenance

**Ami Technologies Ltd** Provide full-service, fully equipped technicians or experts in installation of fire protection systems. Because they know how these systems are built, they know better than anyone how to repair and maintain those systems. Ami Technologies Ltd. provide to monthly or yearly maintenance services.

## PAVA System

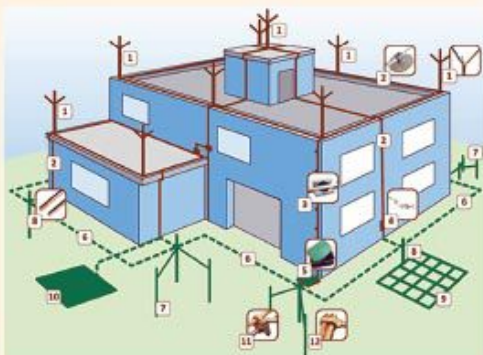

The goal of a PA system is to provide "public address", or a way to transmit audio communication to a group. This transmission can begin with a microphone, which is a device that can assist in magnifying an audio source's volume. A microphone is classified as a device that transforms sound into an electrical signal. Microphones used in PA systems are usually dynamic or condensers. Dynamic microphones are more rugged than condensers and are able to withstand the elements a little better. Condenser microphones utilize their own power source and produce better-quality audio signals, but can sometimes be so sensitive that they also receive background noises.

## CCTV System

Ami Technologies Ltd. expert in the design and installation of effective CCTV systems and surveillance cameras. We have been designing CCTV and integrated System for many years. We offer effective tailor made CCTV system for your business from single camera to multiple sites, multiple camera system incorporating hundreds of cameras. We install the very latest in system technology and constantly reviewing and researching new products to make sure that we stay at the forefront of the cutting edge product technology.

## Lightning Protection System

The function of a lightning protection system is to protect structures from fire or mechanical destruction and persons in the building from injury or even death. A lightning protection system consists of an external and internal lightning protection system.

## Effluent Treatment Plant (ETP) :

An Effluent Treatment Plant (ETP) purifies industrial wastewater using a combination of physical, chemical, and sometimes biological processes to remove contaminants before discharge or reuse. The goal is to reduce pollutants and produce environmentally safe effluent. ETPs typically involve primary, secondary, and sometimes tertiary treatment stages, tailored to the specific characteristics of wastewater and the desired level of purification.

### Type of ETP

- ▶ Physio-Chemical ETP
- ▶ Bio-Chemical ETP

### Biological ETP (MBR, SBR, MBBR, ASP) Application:

- ▶ Textile Industries
- ▶ Pulp & Paper Mills
- ▶ Pharmaceutical
- ▶ Food and Beverage
- ▶ Leather Industry
- ▶ Hospital
